DETAILED ACTION

1. Claims 1, 2, 4-11, 13, 14, 16, 17, 19-21, 23-26, and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims as a whole still contain limitations that render the claims confusing and indefinite. Further the claims fail to tie together the structure in to a complete and operative article. The applicant in the first few lines of claim 1 recites that the articulated strap comprises adjacent links forming a plurality of rows with the links being offset with respect to each other. The applicant then calls for in claim 1 (line 7) that the "articulated strap" comprises modular assemblies. What makes for the modular assemblies? How do the "plurality of rows of offset links" set forth in line 3 relate to the modular assemblies? It is not clear from the claim at present and they seem to be mutually exclusive of each other as drafted. Further on line 2 of claim 1, "the transverse direction" lacks antecedent basis. Are the hinge pins of line 6 different or same to the hinge pin of line 9 of claim 1? What makes for two articulated parts; do the links of line 3 play into the parts? If the modular assemblies are made of two parts; then what makes for a middle part as recited on line 10. It is not clear where the "another transverse hinge pin " (line 13) is located with respect to the "transverse hinge pin of line 9. On line 13/14, the limitation, "one of which is engaged" is unclear in that it isn't clear to what "one" is referencing. The rest of claim 1 contains vague and confusing limitations as recited and contain like deficiencies as detailed. Further, all the claims should be reviewed for like problems

Art Unit: 3725

and amended into proper claim form. Further "the" should be inserted before "modular" on lines 10, 12, 28, 31, and 33. All the claims should be reviewed for this deficiency.

2. Applicant's arguments filed 08/10/2005 have been fully considered but they are not persuasive. The claims continue to contain limitations that render them indefinite and unclear. Hence patentability is precluded under 35 USC 112, 2nd paragraph.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
